

Patricia A. Fuller

Executive Director

Ms. Patricia A. Fuller is Executive Director of the Space and Naval Warfare Systems Center, Norfolk where she serves as the senior civilian who oversees software and systems engineering for Combat Support Information Systems products and services for 2,500 operational commands and over 250,000 users around the world.

Ms. Fuller began her service to the U.S. Government in 1985 with the National Institute of Health. She transferred to Fleet Industrial Supply Center, Norfolk in 1986 and joined the Space and Naval Warfare Systems Command (SPAWAR) team in 1987 with her assignment to the Navy Management Systems Support Office (NAVMASSO).

Throughout her tenure with NAVMASSO and SPAWAR, Ms. Fuller has held virtually every systems engineering, support and management position in the organization including requirements, design, system construction, testing and quality assurance, strategic business planning, project management, financial management and customer relations.

As Deputy Director for Micro Systems, Ms. Fuller managed the engineering, support and installation of medical systems for the over 1,200 sites representing the operating forces of the Navy and Marine Corps. She also developed the business case for logistics information systems to support special operations command, SEAL teams, SeaBees and hundreds of other operating forces needing scalable logistics information systems. As a member of the command's software engineering staff, Ms. Fuller provided leadership, strategies, and plans for organization-wide practices in software engineering, integration, testing, life cycle support, planning and tracking. As Director, Supply and Logistics Department, Ms. Fuller was responsible for supply system technological transition from client-server to web.

Ms. Fuller was selected Executive Director in July 2002, in time to prepare and execute SPAWAR Norfolk support for Navy and Marine Corps units participating in Operation Iraqi Freedom.

Prior to government service, Ms. Fuller conducted financial research, forecasting, planning and execution for an investment-banking firm in Colorado Springs, Colorado.

Ms. Fuller's awards include the Defense Meritorious Civil Service Award for her work on Navy and Marine Corps Medical Systems and the United States Special Operations Command Quality Leadership Team Award for her diligence in delivering information technology to U.S. Navy's Special Operations Commands.
